

Project Management Tool

I am not using a project management tool. I will be keeping any notes or to do items in a text file. I can achieve all of the same functionality of Trello and Zoho in a much more convenient way since I do all of my work from a TTY.

```
25 - Foundation
26   - Large backing
27 - Semantic UI
28   - Complicated?
29   - Heavy JS?
30   - Last release a year ago
31   - Not used by much
32 - UIKit
33   - Many components
34   - Too minimal style
35   - Actively developed
36 - Element ui
37   - Integrates with vue.js
38 - Materialize.css
39   - Has 'tag input' with completion but no dropdown
40   - Following theme adds more stuff: Con Material Admin Dashboard
41     - https://themeforest.net/item/con-material-admin-dashboard-template/10621512?re
42     - Kinda just aggregates and themes a bunch of plugins... (doesn't even theme all
43     - Look through to find good plugins
44     - Does have angular support tho
45 - Django-material *
46   * Can look at example forms.
47     - http://forms.viewflow.io/demo/registration/
48   - Django specific material toolkit
49   - uses materialize.css
50   - looks good
51   - http://forms.viewflow.io/
52 - django-crispy-forms
53   - more generic form rendering engine
54   - http://django-crispy-forms.readthedocs.io/en/latest/
55 - Material Design Light
56   - Another material css framework
57 - material.io
58   - Official from google
59   - meh
60 - Extensions/Plugins
61   - Select2
62     - Offers 'pillbox' support!
63   - jQuery-Tags-Input
64     - Autocomplete
65   - dropzonejs
66     - file upload library!
67   - fullcalendar.io
68     - Opensource calendar!
```

Project Plan

1. Setup a Django server and development repository
2. Create database
3. Create application URL routing
4. Create basic views displaying relevant database information
5. Create frontend GUI
6. Add GUI functionality linking it to database
7. Add user registration and authentication
8. Add permissions to GUI
9. Test and fix bugs

Summary of team's agile standup

I do not have a team.
